

ABSTRACT

A backlight module (3) includes a light source group (31) and a light guide plate (32). The light source group includes at least a light sources (not labeled), the light guide plate has a light input surface (321) for receiving light and a light output surface (322) for emitting light. The light source group faces the light input surface, which is a curved and its curvature matches with the light distribution of the light source group.
